Secretary.

FINL. DEPT., SEP. REV. BRANCH, CALCUTTA, *the 12th May 1914.*

No. 273T.-Com.—The 23rd May 1914.—The following communique regarding the opening of seven Chinese ports to foreign trade is published for general information.

H. L. STEPHENSON,
Secy. to the Govt. of Bengal.

No. 10 (3632), dated Peking, the 12th January 1914.

BY virtue of a Presidential order, dated the 9th instant, the Chinese Government have spontaneously opened to foreign trade seven towns in North China. These new "ports" are Kueihuach'eng, Kalgan, Dolonor, Chihfeng, Taonanfu, Hulutao and Lungkow, and the main result of their "opening" will be to develop international trade and interests in Inner Mongolia.

2. Kueihuach'eng is in the extreme north of Shansi: it is a town of approximately 200,000 inhabitants and is an important market for skins, camel hair, ropes and cereals. Kalgan, in the north of Chihli, has a normal population of 430,000, and is the principal outlet from Inner Mongolia. Both places are connected by rail with Peking. Dolonor, east of Kalgan, contains a mixed population of about 15,000, but it is more in the nature of a military encampment than a commercial city. Chihfeng is about 100 miles east of Dolonor. Both the latter towns lie outside the great wall. Taonanfu is an important point on the Mongolian frontier of Fengtien, and will shortly be connected by rail with the South Manchurian Railway.

3. Hulutao was artificially created, under a British Engineer, during the latter years of the Manchu rule with the object of forming an ice-free port on the Gulf of Liaotung under purely Chinese control. It is already connected with the Peking-Mukden Railway by a branch line from Lienshan. The question of improving the water approaches to Newchwang by the conservancy of the Liao river is at present under consideration and

if, as is to be hoped, the scheme materializes there may be a better prospect of retaining for Newchwang and Hulutao the trade which is now to some extent being diverted to Dairen.

4. Lungkow, in Shantung, is situated about 100 miles west of Chefoo and is already one of the principal centres of the junk-borne coolie traffic into Manchuria. Some of this traffic might possibly now find its way to Hulutao.

5. Of the above seven towns, three only are likely to have much interest for British commerce; namely, Kueihuach'eng, Kalgan and possibly Hulutao. Taonanfu might also become a distributing centre for trade with the Eastern section of Inner Mongolia. The advantages of Kueihuach eng and Kalgan are that British goods will, as is the case with the inland open marts of Manchuria, now reach those places on payment of a single import duty of 5 per cent. instead of the additional 2½ per cent. levied on transit trade. * * * * *
The opening of both these places will enable foreigners to watch at close quarters the working of the transit pass trade and will facilitate the immense export business of Tientsin as well as develop foreign commercial intercourse with both Inner and Outer Mongolia.

His Maiesty's Minister at Peking.

No. 1473M.—The 23rd May 1914.—In exercise of the power conferred by section 69 B(*ii*) of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Governor in Council is pleased to make, in supersession of all previous rules on the subject, the following rules for the guidance of Commissioners of Municipalities in matters connected with the carrying out of the purposes of section 69 (1) (*ii*) of that Act so far as they relate to the supply of water:—

Rules for the management of water-works under the supervision of the Government of Bengal.

1. The management of the water-supply system of every municipality in which such system has been introduced shall vest in the Municipal Commissioners (hereinafter called "the Commissioners"), and the Commissioners shall perform the duties prescribed in the following rules.

2. The Commissioners shall be responsible for the proper application of the water-supply funds. It shall be their duty to take requisite steps to rectify defects in case they find that water-rates are irregularly collected in any instance or are insufficient for carrying out the purposes of Part VII of the Bengal Municipal Act, 1884.

3. The Commissioners shall frame the annual budget of income and expenditure on account of the water-works, and shall submit it to the Sanitary Engineer for any remaks he may consider necessary. The Sanitary Engineer shall return the budget with his remarks to the Chairman of the municipality.

4. The Chairman of the municipality shall, at the end of each month, prepare a statement of the accounts of the water-supply funds, which he shall submit to the Commissioners at their next meeting.

5. The Commissioners at a meeting shall, every month, inquire into all matters connected with the water-supply of the municipality, and examine and pass the accounts submitted under rule 4, and shall record that the accounts have been passed in the book of the minutes of the proceedings of the meeting.

6. In all professional matters connected with the water-works the Commissioners shall be guided by the advice of the Sanitary Engineer.

The Commissioners shall afford the Sanitary Engineer all information he may from time to time require, and shall consider and attend to all communications received from him.

7. The Sanitary Engineer shall exercise complete professional control over the Superintendent of the Pumping Station.

8. The Sanitary Engineer shall visit, or shall depute a representative to visit, the water-works not less than once a year, and shall submit a report thereon to the Sanitary Board. The Commissioners shall arrange for the proper inspection of the boilers and pumping machinery not less than twice a year by a qualified Machinery Inspector or firm of Machinery Inspectors who must be approved by the Sanitary Engineer. The reports of the Inspectors must be submitted in Sanitary Engineer's Form No. 6 (Appendix A) to the Sanitary Engineer, and by him to the Sanitary Board:

Provided that in the case of small water-works the said inspection may, with the consent of the Sanitary Engineer, be held only once a year.

9. Until all points raised in the reports of the Sanitary Engineer and the Machinery Inspector have been disposed of, the Commissioners shall submit to the District Magistrate for transmission to the Sanitary Engineer a monthly progress report showing how far effect has been given to the recommendations made in the reports.

10. (*1*) The Commissioners shall cause to be kept at the pumping station—

(*a*) a stock account in Sanitary Engineer's Form No. 4 (Appendix A), showing the daily transactions in coal and engine-room stores;

(*b*) an engine-room log in Sanitary Engineer's Form No. 3 (Appendix A);

(*c*) a filter-bed log in Sanitary Engineer's Form No. 5 (Appendix A), or a filter log in Sanitary Engineer's Form No. 5A (Appendix A); and

(*d*) such other forms as the Sanitary Engineer may from time to time prescribe.

(*2*) The said forms shall be written up daily by the Superintendent, and shall be available at all times for inspecting officers and visitors appointed under rule 13.

11. The Commissioners shall submit to the Sanitary Engineer not later than the tenth of each month:—

(*a*) Indicator diagrams from each engine in Sanitary Engineer's Form No. 1 (Appendix A) for one day in the preceding month, which must be accompanied by a copy of the engine-room log, Form No. 3 (Appendix A), for the day on which they are taken;

(*b*) an abstract of work done by the pumping machinery during the preceding month in Sanitary Engineer's Form No. 2 (Appendix A);

(*c*) a copy of the filter-bed log or filter log, Sanitary Engineer's Forms Nos. 5 and 5A (Appendix A) for the same day of the preceding month as that to which the indicator diagrams, referred to in clause (*a*), apply; and

(*d*) such other information as the Sanitary Engineer may from time to time require.

12. It shall be the duty of the Commissioners to see that the rules for working settling tanks and slow sand and mechanical filters in water-works (Appendix B) are properly attended to by the Superintendent of the pumping station. If, owing to the design of the works, the rules cannot be conformed to, the matter shall be referred to the Sanitary Engineer for orders.

13. (*1*) The Commissioners shall appoint two of their number in rotation to be monthly visitors of the water-works.

(*2*) It shall be the duty of these visitors to ascertain by inquiry—

(*a*) whether an efficient supply of water is being given;

(*b*) whether the Superintendent and water-works establishment are attending to their duties and a proper discipline is being maintained;

(*c*) whether the works, machinery, plant, implements, materials and all other things connected with the water-works are being properly maintained in an efficient condition;

(*d*) whether these rules are being attended to in all respects; and

(*e*) whether any other matters in connection with the water-works require attention.

(*3*) The visitors shall report in writing to the Commissioners in meeting the result of their inspection, and a copy of their report, with a copy of any resolution that may be passed thereon by the Commissioners, shall be sent to the Sanitary Engineer.

14. A visitors' book shall be kept at the pumping station in which shall be recorded the visitors' remarks.

15. An extract of the Proceedings relating to the water-supply system at each meeting of the Commissioners shall be forwarded, within a week of the date of the meeting, to the Sanitary Engineer, who may, if he thinks fit, and shall, if the Commissioners so desire, submit it with his remarks to the Sanitary Board.

16. The Sanitary Commissioner shall arrange once a quarter for a chemical and bacteriological analysis of the water in each of the water-works, and the results of the analysis shall be communicated to the municipality and laid before the Commissioners at a meeting.

17. (*1*) Subject to the general control of the Commissioners, the duties prescribed for the Commissioners in these rules may, if the Commissioners so decide, be performed by a Committee, to be called "The Water-Works Committee," consisting—

(*a*) at district head-quarters, of the Chairman and the Vice-Chairman of the municipality and four other persons to be elected by the Municipal Commissioners at a meeting;

(*b*) at other municipal towns, of the Chairman and the Vice-Chairman of the municipality and three other persons to be elected by the Municipal Commissioners at a meeting.

(*2*) The Committee shall act as the agents of the Commissioners in all matters relating to the administration of the water-supply of the municipality, and shall for this purpose exercise all the powers vested in the Commissioners by the Bengal Municipal Act, 1884:

Provided as follows:—

(*i*) the Committee must not act in opposition to, or in contravention of, any order passed by the Commissioners at a meeting, and must not exercise any power which is directed by the law to be exercised by the Commissioners at a meeting;

(*ii*) all orders or processes of a compulsory nature shall be issued under the authority and signature of the Chairman of the municipality, or of the Vice-Chairman under authority delegated to him in this behalf by the Chairman under section 15 of the Bengal Municipal Act, 1884;

(*iii*) in respect of the duties imposed by rules 2, 3 and 9, the Committee shall perform the functions of rectification of defects and transmission of documents through the Commissioners.

18. At every meeting of the Committee three members shall form a *quorum*.

[*See Rule 12.*]

RULES FOR WORKING SETTLING TANKS AND SLOW SAND AND MECHANICAL FILTERS IN WATER-WORKS IN BENGAL.

(*Revised by order of the Sanitary Board, Bengal, January 21st, 1913.*)

Settling Tanks.

1. It is important that water drawn from rivers, channels or streams should have as long a settlement as possible before being passed on to slow sand filters, in order that the action of sunlight, the precipitation of suspended matter and the natural tendency to elimination of pathogenic bacteria may have their maximum purifying effect.

2. Settling tanks are worked either on (*a*) the continuous flow, or (*b*) the intermittent system. In the first system, the tanks are kept full, and the water is continually admitted at one end and drawn off from near the surface at the other. In order that this system may be properly used with slow sand filters, the unfiltered water-pumps must be worked continuously throughout the 24 hours or the settling tanks must be fed from a storage reservo r. When designed on the intermittent system, each tank in turn is filled and then kept full until the tanks filled before it are drawn down; the settled water is then decanted through a floating arm or similar apparatus until the tank is lowered to the lowest draw off level, when it is again filled.

The whole available storage capacity of settling tanks should always be used as far as possible. On the other hand, care must be taken in tanks unprovided with fixed overflows, not to fill them to a greater depth than they are designed for.

3. When a deposit of from 18 inches to 2 feet of silt has formed at the bottom, the tank should be emptied and cleaned out. This work must always be done in the dry weather and preferably between February and April.

4. In the rains and when there is an excessive amount of suspended matter in the raw water, clarification will generally have to be assisted by the use of a coagulant. The precipitant most commonly used in Bengal water-works is aluminoferric. This depends for its effective action upon the alkalinity of the water. If more of the chemical is used than can be decomposed by the carbonates present, it will remain dissolved in the water and will be wasted.

Generally speaking, not more than 2 grains per gallon of aluminoferric should be used. Before decidin on the quantity to be added a sample of the water to be treated should be sent to the Sanitary Commissioner for analysis and advice on this point.

5. The aluminoferric must be added at the inlet end of the settling tanks, and experiments should be made to ascertain the time taken by a given quantity to dissolve. One grain per gallon is 1 lb. per 7,000 gallons treated. Thus, if 300,000 gallons per day are treated with 2 grains per gallon, the daily quantity used will be 86 lbs.

Slow Sand Filters.

6. The rate of delivery on to a sand filter is regulated by (*a*) the available head between the settling tanks and the inlet valve, and (*b*) the amount the inlet valve is open.

The rate of flow through the filter depends upon (*c*) the resistance of the sand in the filter, and (*d*) the filtration head or difference in level between the surface of water on the filter-bed and the water in the outlet well.

The discharge from the outlet well to the clear water reservoir depends on (*e*) the amount the outlet valve is open, or in the case of a telescopic outlet the extent to which the bell mouth is lowered.

It is obvious that these factors are mutually interdependent, for more water cannot flow out of a filter than is delivered on to it, nor than can make its way through the sand.

Factors (*a*) and (*c*) continually tend to vary, so (*b*) and (*e*) must also be altered from time to time in order to maintain a constant flow through

the filter. In some filters the inlet is controlled by a ball valve which keeps the level of the water on the filter always the same. In this case, the flow through the filter is regulated by (*e*). In all filters the surface of the water on the sand should be always kept as nearly the same level as possible and the filtration head regulated by the outlet valve or telescopic weir. The depth of water on the sand should be somewhere between 2 feet and 3 feet 6 inches. Gauges measuring to the same datum should be fixed on the wall of the filter and in the outlet well so that the difference in level can be easily measured.

7. Filtration should be carried on continuously day and night as nearly as possible at the same rate, usually somewhere between 3 or 4 inches vertical an hour. The rate of flow must on no account exceed the latter figure.

Where there is no direct method of measuring the flow of water through a filter such as an outlet gauge notch or a meter, it may be ascertained by closing the inlet valve and leaving the outlet valve open. The fall of the surface of the water in inches at the end of an hour will give the rate of flow per hour.

8. In a new filter or one recently scraped, the filtration head required will be very small, but it will rapidly increase. In the usual way, a filter should be scraped before the filtration head reaches 12 inches. It must never be allowed to exceed 15 inches.

9. A filter should be scraped by carefully removing the slimy ooze which has formed on the top, together with about ¼ inch of sand. The sand removed may subsequently be used again if properly washed in a sand-washer. The depth of fine sand must never be reduced to less than 18 inches, and when this thickness is reached, the filter must be replenished. Before replenishing about 2 or 3 inches of sand should be removed, and the remainder dug over and loosened; clean washed sand is then to be added until the original thickness is obtained.

10. If the water filtered has been of a very bad quality or the filter has been mismanaged, or been long in use the whole filter may require to be renewed. In this case, the whole of the filtering material, coarse sand and gravel as well as the under-drains must be removed and washed before replacing.

11. After a filter-bed has been scraped, replenished, or renewed, it should, if possible, be charged from below by admitting filtered water very slowly until the surface is about 3 inches above the sand; the filling can then be completed from above. If there is no arrangement for filling from below, the filling must be very carefully and slowly done from above.

After filling, water should be passed through the filter at the rate of about one inch vertical per hour and run to waste for 24 hours after scraping and four days after replenishing or renewing.

12. Daily records must be kept in the filter-bed log-book [Sanitary Engineer's Form 5 (Appendix A)] of the quantity of water filtered and the filtration head, recorded at intervals of three hours throughout the day.

Mechanical filters.

13. For each installation of mechanical filters, rules for working must be obtained from the makers of the plant, but the following points must be attended to in all cases:—

(*i*) The efficiency of the plant depends upon the proper proportioning and correct addition of the coagulant. The actual amount of coagulant required is determined by local conditions. It will vary during different seasons of the year and can be best ascertained by experiment in actual working.

(*ii*) The precipitant generally used is sulphate of alumina, and this should be purchased under a proper specification of chemical composition. The precipitant is made up into a strong solution in large vats and added to the raw water by an adjustable apparatus. The water so treated is then allowed to settle for some hours before filtration.

In cases, where sedimentation continues for a considerable time after the coagulant has been applied, it may be necessary to add a small additional quantity of the chemical to the water immediately before passing it to the filters.

(*iii*) The rate of filtration should be kept as nearly as possible constant and must not exceed the rate for which the filters had been designed. Generally, filters are provided with automatic controllers, and these must on no account be tampered with or made to pass more water than intended.

(*iv*) The maximum filtration head permissible varies with different types of plant; it is usually not more than 10 feet. When the maximum head is reached, as shown by the indicator, the filter must be washed.

(*v*) Washing must always be done with filtered water. In the case of a battery of two or more pressure filters, they may be arranged so that one can be washed with filtered water from another.

Washing must be continued until the waste water becomes quite clear. After washing, the filtered water must be run to waste for 20 minutes before connecting to the town.

(*vi*) Daily records must be kept in the filter log-book [Sanitary Engineer's Form 5A (Appendix A)] of the quantity of water filtered, the amount of sulphate of alumina used, the hours during which filtration has been carried on the filtration head (recorded at intervals of three hours), the length of time taken to wash each filter, and the hour at which it was washed.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE JAIL DEPARTMENT IN THE PRESIDENCY OF BENGAL FOR THE YEAR 1913.

POLITICAL DEPARTMENT.

JAILS.

DARJEELING, THE 25TH MAY 1914.

RESOLUTION—No. 549P.—D.

READ—

The Report on the Administration of the Jail Department in the Presidency of Bengal for the year 1913.

Read also—

The Reports for the years 1912 and 1911 and the Resolutions of Government recorded thereon.

A noteworthy incident of the year's administration was the closing of the old Presidency Jail situated on the Maidan. With the approval of the

Secretary of State, the original jurisdiction of the High Court was extended so as to include the jail known as the Alipore Central Jail, which will henceforth be utilized and designated as the Presidency Jail. The effect of the release of prisoners on the 12th December 1911, on the occasion of the celebration of the Imperial Durbar at Delhi, in decreasing the jail population has now almost ceased to be felt, and the daily average strength of convicted prisoners in confinement has risen from 10,091 to 10,611. The number of prisoners in jail at the close of the year increased by 769. The increase was shared by both convicts and under-trial prisoners: the daily average number of the latter was 1,452 against 1,214 in the previous year. The average period of detention of under-trial prisoners before the Courts was on the whole slightly less than in 1912; but it was excessive at Midnapore and in Sessions cases at Krishnagar, Khulna and Mymensingh. The increased jail population was accompanied by more offences committed and more punishments inflicted. It may be noted, however, that though the ratio of punishments was greater, the offences were more of a nature demanding minor penalties; the infliction of major punishments under most heads was less frequent, while the proportion of whippings to total punishments remained practically unchanged. The number of sentences of imprisonment with whipping shows a continuous and notable decline from the year 1908, except in the year 1912: the number in 1913 was 11 as compared with 65 in 1908. The increase in the proportion of convicts undergoing sentences not exceeding one month is a less satisfactory symptom. It now amounts to more than one-third of the convicts imprisoned.

2. The death-rate among prisoners declined slightly, and is lower than it has been during the last five years. A distinct improvement was noticeable in the case of some of the more unhealthy jails; in Burdwan the high death-rate was due to exceptional causes. A few outbreaks of cholera were promptly checked, and the deaths from malaria declined by over 50 per cent. Though dysentery was more prevalent, it is satisfactory to note that in 14 jails no deaths resulted from this cause. Barisal continues to suffer most from this disease, which is under investigation in that jail by a Special Officer. The water-supply is reported to be open to grave suspicion, and His Excellency in Council considers it desirable that the arrangement between this jail and the municipal authorities in the matter of water-supply should be definitely settled. The larger number of prisoners admitted to hospital is attributed not to more widespread sickness, but to a stronger insistence on the prompt and early treatment of disease in hospital. The adoption of this policy and the more efficient supervision which is rendered possible by fewer changes in the personnel of the medical staff cannot fail to effect an improvement in the general health of the jails.

3. A very satisfactory feature of the year's work is the continued attention that is being devoted to the problem of juvenile criminality. The "Star Class" system in force in the Juvenile Jail at Alipore which was described in the last year's report, continues to give good results: the boys receive elementary education and instruction in some trade to enable them to obtain employment on their release. A gratifying advance has been made by the opening of a special ward in the Juvenile Jail for the accommodation of juvenile offenders undergoing trial. Progress is not confined to Calcutta, as all Central Jails and some of the larger District Jails are provided with special juvenile wards; while a depôt for the reception of young female offenders has been opened in the Midnapore Central Jail. The Inspector-General remarks that boys are and can be improved by the care and discipline of Juvenile Jails; but that, to ensure real good, such effort requires to be supplemented by an agency like the Borstal Committee or "After Care" Association, which will take charge of the boys and find suitable employment for them. The Governor in Council is in hearty agreement with the Inspector-General on this subject. The effort to increase the reformative character of the treatment of juvenile criminals by means of probation and supervision, and the Borstal system of confinement in a special institution have been the most successful features of prison reform in other countries; and His Excellency in Council awaits with interest the forthcoming report of the Juvenile Offenders Committee. Comprehensive efforts, it is hoped, may yet be made to extend and systematize

the methods of dealing with the young offender. Meanwhile an institution in charge of a Superintendent will shortly be opened in Calcutta, to be used as a House of Detention for juvenile offenders. A number of ladies and gentlemen will be appointed visitors, and in the building will be located a Juvenile Offenders Court composed of selected Honorary Magistrates.

4. In the warder service the number of resignations has increased, and the Inspector-General has again urged the necessity of increased pay and a pension for all grades of warders. His detailed proposals on these subjects have received sympathetic consideration from Government; and it is hoped that certain improvements will be effected with a view to render the service more attractive. Connected with the strength of the warder force is the question of the employment of convicts as prison officers. The proportion of convicts employed was less, but the number employed is still large. The scheme for the reorganization of the jailor establishment has now been sanctioned.

5. Owing to the continuous rise in the price of food-grains, the dietary charges show an increase. The cost per head was Rs. 40 compared with Rs. 35 in the previous year. The dietary recommended by Major McCay, which has been introduced on a voluntary basis, has been used somewhat more extensively, especially in the western districts of the Presidency; but it still remains unpopular. The Inspector-General gives reasons for the attitude of Bengali prisoners towards this scale of diet. To what extent this diet can be introduced as a permanent measure, and what modifications may be necessary to suit the circumstances of Bengal, can only be apparent after practical tests have been carried out and the physiological and economical results of the experiment have been observed.

6. The Governor in Council has read with interest of the work of the Jail Department in the distribution of quinine. Arrangements have been made for the supply to the Sanitation Department of quinine in "treatment" form. A treatment consists of 80 grains, that is, 20 tablets of 4 grains each, placed in attractive and handy glass tubes. The tablets are made in the jail, packed in tubes and boxes, and distributed to Civil Surgeons, Hospitals and other Agencies. Last year six thousand pounds of quinine were distributed, and the Juvenile Jail can now produce daily forty pounds of quinine in tablet form. The Governor in Council highly appreciates the services rendered by the Jail Department during the last 20 years in extending the benefits of this useful product.

The Inspector-General has again drawn attention to the use that might be made of jail manufactures by other branches of Government service. His observations on the subject will be communicated to other departments.

7. The names of officers whom the Inspector-General has commended for good work have been noted. The thanks of the Governor in Council are due to Lieutenant-Colonel W. J. Buchanan, C.I.E., I.M.S., for his efficient and sympathetic administration of the Department during the year.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Inspector-General of Prisons, Bengal, for information and guidance.

Ordered, also, that a copy of this Resolution and a copy of the Report be submitted to the Government of India in the Home Department.

Ordered, also, that the Resolution be published in the *Calcutta Gazette*.

By order of the Governor in Council,

J. G. CUMMING,

Chief Secretary to the Government of Bengal.

(4) If any objection is made to any voting paper on the ground that it is invalid under these rules, or to the rejection by the Returning Officer of a voting paper, such objection shall be decided at once by the Returning Officer, whose decision shall, subject to the provisions of rules 15 and 16, be final.

11. (1) When the counting of the votes has been completed, the Returning Officer shall, subject to the provisions of section 4, forthwith declare the candidate or candidates, as the case may be, to whom the largest number of votes have been given to be elected.

12. Upon the completion of the counting and after the result has been declared by him, the Returning Officer shall seal up the voting papers and all other documents relating to the election and shall retain the same for a period of six months, and thereafter cause them to be destroyed.

(2) If the Commissioner or the said officer is satisfied that the provisions of rules 1 and 2 have been sufficiently complied with in respect of the car, he may grant a certificate to that effect, and thereupon the car shall be deemed to have been registered under these rules and the Commissioner shall cause to be made in the register of motor-cars such entries in respect of the car as are required by clause (6) of the said rule 1.

(3) Notwithstanding anything contained in the proviso to clause (1) of rule 2, if the owner of any heavy motor car which was registered under rules formerly in force under the Bengal Motor-car and Cycle Act, 1903, does not within one month after the commencement of these rules obtain a certificate as aforesaid in respect of the car, the car shall not be used until it has been registered under these rules, except for the purpose of being taken to be registered; and the previous registration of the car shall be cancelled.

4. (1) The axle-weight of a heavy motor-car shall not exceed the registered axle-weight.

(2) The registered axle-weight of an axle of a heavy motor-car shall not exceed eight tons, and the sum of the registered axle-weights of all the axles of a heavy motor-car shall not exceed twelve tons.

5. (1) (*a*) In all cases the driving wheels of heavy motor vehicles shall be fitted with twin resilient tyres.

(*b*) The non-driving wheels, if fitted with resilient tyres, shall, if the axle load is or exceeds four tons, be fitted with twin tyres.

(*c*) The non-driving wheels, if fitted with non-resilient tyres, must be smooth and without any projection, and shall not be constructed of separate plates separated by any spaces whatsoever.

(2) The width of the non-resilient tyre of each wheel of a heavy motor-car shall be not less than six inches and the tyres of the wheels on the same axle shall be of equal width.

(3) The permissible axle-load shall not exceed five hundred weights for each inch in width of the combined width of the two tyres of the axle in question.

Diameter of wheel of heavy motor-car.

6. The diameter of the wheels of heavy motor-car, if they are fitted with a tyre which is not pneumatic or is not made of a soft or elastic material, must be not less than two feet six inches.

Use of heavy motor-car upon bridges.

7. (1) When any authority who is liable for the repair of a bridge affixes or sets up in suitable and conspicuous positions, on the bridge and in each approach to the bridge notices stating that the bridge is insufficient to carry a heavy motor-car the registered axle-weight of any axle of which exceeds such weight as may be specified in such notices, the owner of any such car shall not cause or suffer the car to be driven, and the person driving or in charge of any such car shall not drive the car upon the bridge, except with the written consent of the said authority.

(2) The owner of any heavy motor-car, the axle-weight of any axle of which exceeds six tons, shall not cause or suffer the car to be driven, and the person driving or in charge of any such car shall not drive the car upon any bridge at any time when another heavy motor-car is on the bridge.

(2) Not more than one trailer shall be drawn by any motor-car:

Provided that the Commissioner may, by order, for special reasons to be recorded by him, permit more than one trailer to be drawn by any such car upon such conditions (if any) as may be specified in such order.

(3) The Commissioner of Police may, by notification or otherwise, prohibit the use of certain public places—

(*i*) by heavy motor-cars on the grounds of—

(*a*) public safety or convenience; and

(*b*) the suitability or otherwise of such roads to heavy motor-car traffic; as well as

(*ii*) by heavy motor-vehicles with resilient tyres plying for passenger traffic.

Marking of trailer.

9. The owner of every trailer shall cause to be printed or otherwise plainly marked on a conspicuous part of the right or off side of the trailer, in letters and figures not less than one inch in height, and of such shape and colour as to be clearly legible and clearly distinguishable from the colour of the ground whereon the said marking is made,—

(*a*) the weight of the trailer when unladen, and

(*b*) the axle-weight of each axle of the trailer, if the weight of the trailer when unladen exceeds one ton;

and shall cause the said marking to be from time to time repaired or renewed, as often as may be necessary to keep the said letters and figures clearly legible and clearly distinguishable.

Axle-weight of trailers.

10. The axle-weight of an axle of a trailer shall not exceed four tons.

Power of Commissioner or his office to ascertain axle-weight of heavy motor-car or trailer at any time.

11. (1) Whenever the Commissioner, or any officer duly authorized by him in this behalf, has reasonable ground for suspecting that the axle-weight for the time being of any axle of any heavy motor-car or trailer drawn thereby exceeds the registered or marked axle-weight of that axle, he may—

(*a*) require the person driving or in charge of the car to drive the car, or cause it to be driven, with or without the trailer, to a weighing machine, and

(*b*) cause the axle-weight for the time being of any such axle to be ascertained.

Width of tyres of trailers.

12. To every trailer exceeding one ton in weight, when unladen, the wheels of which are fitted with tryes which are not pneumatic and are not made of soft or elastic material, clauses (1) (*c*), (2) and (3) of rule 5 shall apply, with the substitution—

(*a*) of three inches for six inches as the minimum width of the tyres, and

(*b*) of references to the axle-weights marked upon the trailer in pursuance of rule 9 for the references to registered axle-weights.

Diameter of wheels of heavy trailers.

13. Rule 6 shall apply to every trailer exceeding one ton in weight when unladen, the wheels of which are fitted with tyres which are not pneumatic and are not made of a soft or elastic material.

PART IV.—Motor-cabs.

1. For the purpose of these rules a motor-cab means a light motor-car as defined in Part I used for the purpose of standing or plying for hire in any street or public place.

2. All taxi-cabs plying for hire on the streets shall be registered annually and hold a subsisting certificate.

3. On the registration of a motor-car as a motor-cab, a certificate of registration shall be granted by the Commissioner of Police in the form given in Schedule II to these rules.

4. Notwithstanding anything to the contrary in sub-clause (3) of rule 1 in Part II of these rules the fee payable for the first registration of a motor-car intended for use as a motor-cab shall be Rs. 16 and that for every re-registration of such a car shall be Rs. 8.

5. A license to drive a motor-cab shall be in the form given in Schedule III to these rules, and the rules therein contained shall be read as a part of these rules.

6. An applicant for a driver's license under these rules shall, before receiving such license, satisfy the Commissioner of Police that he is acquainted with the principal places and streets in and around Calcutta and Howrah, that he has a thorough knowledge of the prescribed rates for hire, and that he is in all respects a fit person to be the driver of a motor-cab.

7. The license of a driver may be cancelled or suspended or otherwise dealt with by the Local Government for any breach of these rules.

8. No motor-car shall be used as a motor-cab, unless fitted with a taxi-meter or approved mechanical device for automatically and visibly registering on each occasion the fare to be charged according to the rates for distance or time or a combination of distance and time. Every taxi-meter when in use shall be locked and sealed, so that it may not be tampered with.

Every taxi-meter shall be fitted with an indicator or handle in the form of a flag on which shall be printed the words "for hire." The taxi-meter shall be so constructed that when the indicator is vertical the taxi-meter shall be out of action. Such indicator shall be so placed as to be clearly visible to any person outside of and in front of the vehicle, and to the hirer when inside.

The vertical position indicates that the vehicle is available for hire, and no driver shall without reasonable excuse refuse to accept a fare when the indicator is in the vertical position.

Any owner, driver, attendant or other person who shall break or tamper in any way with the seal placed on the taxi-meter, or who shall, with intent to deceive, tamper with the taxi-meter or the driving mechanism thereof, shall be deemed to have committed a breach of this rule.

8*a*. Every taxi-meter referred to in rule 8 shall, after it is affixed to a motor-cab, whether for the first time or after repair or other readjustment, be submitted to the Commissioner of Police, or to such officer as he may empower in this behalf for the purpose of being examined as to correctness of fittings, and being given a practical road-test over a measured distance of one mile and a time-test of not less than half-an-hour. If found to be correct, the taxi-meter and its fittings shall then be sealed to the motor-cab in such a manner that it cannot be removed or tampered with without the seals being broken or removed.

8*b*. Every taxi-meter shall, at the end of each period of six months (the first of such periods commencing from the date of the test referred to in the last preceding rule), be submitted to similar test:

Provided that every taxi-meter shall, at any time, if so required by the Commissioner of Police, be submitted to him or to such officer as he may empower in this behalf, for the purpose of undergoing such test or any portion thereof.

8*c*. The owner of every motor-cab shall cause to be kept in the cab, for the inspection of the Public, a register in which the testing officer referred to in rule (8*a*) shall, after each of the tests contemplated in the preceding rules, enter the date and result of such test.

8*d*. Every motor-cab shall be provided with a light so placed as to illuminate the taxi-meter at night.

9. In every motor-cab there shall be available for the inspection of customers a list of rates, and the fare charged for the hire of the motor shall not exceed the maximum fare calculated according to the scale of the rates set forth in the list as may be applicable.

10. The driver of every motor-cab shall, as soon as he is hired and no sooner, set the taxi-meter in motion, and upon the termination of the hiring shall immediately stop the same. If he neglects or fails to do so, he shall be deemed to have committed a breach of this rule. But if a motor-cab is called from a garage or a stand to take up a passenger at any place less than 500 yards from the garage or stand, the taxi-meter shall not be set in motion until the motor-cab shall arrive at such place and be ready to take up the passenger:

Provided that in the event of a motor-cab whilst hired being unable to proceed from any mechanical derangement or tyre failure, either temporarily or otherwise, the driver shall at once stop the mechanism of the taxi-meter as against the hirer, and shall not re-start the same until such time as the defect is remedied.

11. A driver of a motor-cab shall, in the absence of reasonable cause to the contrary, proceed to the destination named by the hirer and by the shortest and quickest route.

12. The brakes shall, as far as possible, be so affixed as to be capable of easy adjustment. At least one brake shall be so made as to be applied by the foot of the driver, and at least one shall act directly upon the road wheels.

13. All brake and steering connections secured with bolts shall have such bolts secured with nuts, the same to be locked or pinned.

13*a*. Every motor-cab shall be capable of being readily steered, and able to turn on each lock and to proceed in a contrary direction within a roadway not more than 30 feet wide from kerb to kerb:

Provided that the Commissioner of Police may, in his discretion, grant a certificate of registration as a motor-cab to a motor-car intended for use as a motor-cab, if such car is capable of turning within a reasonable space over and above the 30 feet above prescribed.

14. Every precaution shall be taken by the owner to see that all parts of the mechanism of the car are periodically inspected and kept in proper working order, and a register shall be kept of such inspections in a convenient form giving the particulars shown in Schedule IV to these rules. This register shall be open at any reasonable time to the inspection of the Commissioner of Police or any person duly authorized by him in that behalf. Any failure to maintain this register or to produce it when called for by lawful authority shall be deemed to be a breach of this rule.

15. No oil shall be allowed to drop upon the roadway, and where a tray or undershield is fixed below the mechanism of the car for the purpose of preventing this or for any other purpose, such tray or undershield shall be so placed or constructed that no petrol from the tank, supply pipe or carburettor can collect therein.

16. Tanks for petrol must be so placed that any overflow shall not fall on to nor soak into cushions, upholstery or floor mats in or about the body, and the filling nozzle shall be brought to and permanently fixed to some point outside the body. No petrol shall be poured into the tank whilst the engine is running or whilst any lamp is burning in or on any portion of the car.

16*a*. Effective means shall be provided in every motor-cab for preventing the heat of the motor or of the exhaust pipe connections from injuriously affecting other parts of the cab or interfering with the comfort of passengers. All wires carrying an electric current must be properly insulated and protected from injury, and so placed that they cannot be a source of danger.

16*b*. In any motor-cab the outlet from the silencer shall not be so placed as to project the exhaust d rectly on to the road, or so placed or directed as to alarm horses that may be immediately behind the cab.

17. Every motor-cab shall have at least one driving wheel fitted with an approved means of preventing or limiting side slip, and shall carry at least one spare inflated tyre and rim or other approved device which can, if necessary, be quickly fitted to any wheel.

18. Every motor-cab shall be provided with a means of communication between passenger and driver.

18*a*. Every motor-cab shall be provided with adequate means for the conveyance of a reasonable quantity of luggage, and with a sufficient number of chains, straps or other means of securing such luggage. No luggage shall be carried on the roof of the cab, unless there has been affixed thereto a guard rail of a type approved by the Commissioner of Police or by such officer as he may empower in this behalf.

19. Where acetylene or other gas is used to light the carriage, the cylinders or vessels which contain the gas or in which it is generated must be fixed outside in such a position as to minimize the danger of accidental ignition.

19*a*. No celluloid or zylonite fittings shall be placed inside or outside any motor-cab:

Provided that this rule shall not apply to the inside of the accumulators contained in such cab.

20. No printed or written matter other than the sanctioned rates for hire or these rules shall appear on the outside of a motar-cab or be carried by way of advertisement. Small advertisements of a pattern to be approved by the Commissioner of Police may, however, be exhibited within the cab.

20*a*. The cushions of the seats in every motor-cab shall be covered and stuffed with suitable material to be approved by the Commissioner of Police or by such officer as he may empower in this behalf.

21. The doors, windows, seats, roof, springs, wheels, cushions, linings, panels, etc., and all furniture and appointment of a motor-cab, shall be in proper order and repair the paint and varnish in good condition and the inside perfectly clean. The floor shall be covered with a mat of rubber, coir or other suitable material.

22. The Commissioner of Police may prohibit the use of a motor-cab which is in his opinion unfit to ply for hire until such time as the defects are remedied to his satisfaction.

23. The carrying capacities of all motor cabs shall be fixed by the licensing officer.

24. The driver of a taxi-cab immediately after any hiring shall carefully search for any property accidentally left in it, and take the same within 24 hours, if not sooner claimed by the owner, to the nearest Police station.

6. No passenger shall refuse or omit to pay the legal fare for the journey in a motor omnibus.

7. All carriages must be presented for inspection in a thoroughly good condition, and no carriage will be certified fit for publice use unless it is properly painted and varnished; but proprietors may, if they so desire, apply for a preliminary inspection of the chassis.

The following conditions must also be strictly complied with :—

Each new type of motor vehicle intended for licensing must be presented at such place as the Commissioner may appoint for inspection. The proprietor must at the time of inspection produce the certificate from the maker stating that the materials of which all the parts of the vehicle are constructed are good, that the machinery is safe, and that the vehicle is in every way fit for use as a public carriage.

8. If, after inspection, the vehicle is approved, such approval may extend to all vehicles of that description, and others of the same type need not be again presented except as hereinafter provided, but taken to such place as the Commissioner may appoint to be registered and passed, provided a certificate from the maker is submitted with each vehicle presented for licensing purposes, stating that it is in every respect similar to that already approved and respecting which a certificate has been furnished.

It must be clearly understood that, if after the type has been passed, defects develop, which in the opinion of the Commissioner render it unsuitable as a type for public service, the Commissioner reserves the right to withdraw such approval entirely or until the defects have been remedied to his satisfaction.

9. A certificate from the proprietor, stating that there has been no alteration in the design of the machinery since the previous inspection and date covered by the makers' certificate, must be presented with each omnibus submitted for renewal of license. Should any alteration be made, full particulars of such must be stated and the same course may be required as for a first inspection.

10. Should it be deemed necessary, an expert will be employed to advise on the subject. The fee for the expert examination must be deposited by the proprietor with the Commissioner, which fee will be returned should the vehicle be passed without alteration being required.

11. When making application for the carriage to be inspected the proprietor must specify the route or routes upon which he intends the vehicles to ply, and these routes may not be departed from except after due notice has been given to the Commissioner, and sanction received.

NOTE.—Nothing in this regulation shall be taken to prohibit a proprietor changing the route as often as he chooses, provided the carriage has been previously certified to be fit for such route.

12. Omnibus must be so constructed that the following maxima of weight are in no case exceeded :—

Weight

Unlanded	3 tons.
Or if the manufacturers prefer—

13. Not to exceed 20 feet; but if the platform is to be constructed upon the frame the total length may be 21 feet.

Chassis, length

Clearance.—All the underparts of the vehicle inside the pivots of the front axle and steering arms (which must be placed as near as possible to the road wheels) as far back at least as the rear axle must clear the ground at least 10 inches when the vehicle is fully loaded, sufficient allowance in addition being made to provide for the wear of the tyres, set of the springs, or other causes of lessened height, so that the minimum clearance of 10 inch is at all times maintained.

Chassis, springs. Must be properly hung, of sufficient strength and flexibility to meet all purposes which may be required of them.

The rear springs must be attached to, or bear upon the back axle or axle-casing as near to the road wheels as possible and the distance between the outsides must not be less than 5 inches; where a cross spring is used, it must be so applied that it shall not cause or increase side ways. The front spring must be as wide apart as possible, and not less than 38 inches, from outside to outside.

Wheel-base. Should not exceed 14 feet 6 inches and it should in all cases be so proportioned that skidding or improper movements shall be as far as possible, avoided.

NOTE.—If it is found that a vehicle is apt to skid or be otherwise improperly moved unduly, the Commissioner reserves the right to serve a notice on the proprietor "not to use", and may refuse to license the vehicle again until the defects have been remedied.

Wheel track. For both front and rear wheels should coincide, and measurement from centre to centre taken in line with the axles, must not be less than 5 ft. 6 in. In no case must the front track be less than the rear.

Road Wheels Must be of sufficient and suitable diameter, but not made so heavy as to throw an undue strain upon the steering gear or other parts.

Chassis, tyre The materials of which the tyres are made must be soft and elastic, so as to reduce vibration, etc. Sectional tyres must not be fitted to a vehicle submitted for inspection and license.

Chassis, length Must be such that the total length of the complete vehicle in no case exceeds "21 ft."

Chassis, breadth. The breadth must not be greater than 7 ft. 6 in. at any part.

14. Each vehicle must be fitted with at least two independent brakes each capable of stopping and holding carriage under all conditions. They must also, where necessary, be fitted with an approved form of compensating device.

NOTE.—The maintenance of the brakes in perfect order is of the utmost importance, and this will be at all times insisted upon. They will at any time be subject to inspection by the Police.

15. The brakes, should, as far as possible, be so fixed as to be capable of easy adjustment, and at least one must be supplied by a pedal. Brakes will not be deemed independent which are operated by pedals, or levers acting through the same connections, upon the same brake blocks, or upon the same brake drums and at least one must act directly upon the road wheel without any connection with the propelling gears.

16. The operation of either brake must be in no case declutched.

19. The steering arms, and other connections thereof, must be of ample strength, and as far as possible protected from damage by collision.

20. The ball and socket joints of steering connections. when such are used, should not be pendant but the longitudinal or transverse rods must be carried upon the ball.

21. All brake and steering connections secured with bolts or pins must have such bolts threaded and fitted with nuts, which latter must be locked or pinned. The whole of the brake and steering parts must be maintained in perfect order and will be subject to inspection at any time.

22. All parts connected by bolts, or studs and nuts, subject to severe vibration, must be fastened by lock nuts, or by nuts and approved spring or lock nut washers, to prevent their working loose and causing noise, and any carriage with lamp brackets or other fittings loose, and likely to cause unnecessary noise, will be regarded as unfit for public service.

23. The machinery must be so constructed that no undue noise or vibration arises from its use.

The maintenance of the carriage in a satisfactory condition in this respect will be strictly enforced.

24. Every vehicle must be submitted at a time and place appointed, to be specially tested, in respect of noise and vibrations.

25. All omnibuses must be so geared that their highest speed shall not be in excess of the maximum laid down, *viz.*, 12 miles an hour.

26. When a vehicle is submitted for inspection the gear ratios must be supplied and this ratio must both be altered without the authority of the Commissioner. The revolution of the engine when running at the speed which will give 12 miles an hour with the stated highest speed gear must also be supplied.

27. The lubrication of the engine and the carburation of the working mixture must be so controlled that smoke shall not be emitted with the exhaust, or from any other part.

Propretiors of vehicles not properly maintaining them in accordance with this requirement may be served with a notice "not to use" until the defect has been remedied.

28. Carburattors or other petrol receptacles, unless they are suitably encased or screened, must not be placed in close proximity to magnetos, or to connections of wires carrying electric current.

29. When a guard tray, or undershield, is fixed beneath the engine and adjacent machinery, it must be so constructed that any overflow of petrol shall not be retained in the tray.

30. Suitable and approved appliances for extinguishing fire must be carried in such a position as to be readily available for use.

31. Tanks for petrol or other liquid fuel must be made of suitable material, properly constructed, and of sufficient strength. They must be so placed that any overflow shall not fall upon wood-work, or accumulate where it can be readily ignited. The filling nozzle or inlet for the petrol or other liquid fuel should, where possible, be brought to the outside of the body.

32. All wires carrying electric current must be properly insulated and protected from injury, and so placed that they cannot be a cause of danger.

33. Effective means must be adopted for preventing the heat of the motor, generator or of the exhaust pipe connections, from injuriously affecting any parts of the vehicle or the comfort of the passengers.

34. The exhaust pipe must not be led inside the tray or under-shield or be fixed in such a position that oil, or any inflammable material, is likely to be dropped upon it.

35. The outlet from the silencer must not be so placed as to project the exhaust directly to the rear or on to the roadway, or be so placed, or so directly as to alarm horses immediately behind the vehicle.

36. The machinery must be so constructed or placed that oil or grease from the bearings cannot drop on to the roadway, and the maintenance of the vehicle in this respect will be strictly enforced.

37. When trays are fixed beneath the parts. they must have suitable webs for retaining the oil when ascending or descending bridges, or be otherwise suitably constructed with that object. Oil or other material collecting in the trays must be cleaned out frequently and not allowed to accumulate.

38. If requisite, a bar or bars, having an eye or bridle to surround the propeller shaft, must be so fixed, that in the event of either the shaft or gear-box breaking, either damage or danger therefrom is minimised.

39. Driving chains and sprockets must be protected by a suitable guard.

40. *Body, camber.*—The camber should not be more than 3 inches but may, if the proprietor so desires, be made up to but not exceeding 5 inches, provided the outside of roof is so constructed as to give an equivalent in all respects to a 3-inch camber and the maximum height from the ground is not in any way increased.

Height.—The height inside measured in the centre line of the omnibus from the top of the floor battens to the lower edge of the hoop stick or other projections must not be less than 5 feet 10 inches nor more than 6 feet to the centre line of roof-boards. From ground to the spring of roof outside, or edge of drip-boards, the height must not be greater than 9 feet, nor must the height to the outside centre of roof be more than 9 feet 3 inches.

Body breadth inside.—The width between seat backs must not be less than 56 inches where the seats are placed lengthwise.

Body-seats.—At least 16 inches measured in a straight line must be allowed for each passenger on every seat, which seat must be fit and proper and covenient for sitting on. When cross or "garden" seats are fitted inside these must be at least 26 inches clear from the inside back of the seat in front of it. So that there shall be room for the keens of passengers.

41. Corner pillars for bodies must be of sufficient strength, and the body must be properly ironed and stayed to give the necessary strength for the weight to be carried and to resist the effects of the vibration to which it is liable.

Definition.

1. In these rules "local authority" means the members of a District or Local Board constituted under the provisions of the Bengal Local Self-Government Act, 1885.

Schemes and Projects.

Preparation of sketch of project.

2. (*1*) Whenever a local authority desires to undertake a project for water-supply or sewerage or a comprehensive scheme of surface drainage, it shall first cause to be drawn up a sketch of the project roughly shewing its scope and approximate cost.

(*2*) Such sketch may be drawn up either by the Sanitary Engineer at the request of the local authority, or, subject to his supervision, by any firm or person approved by the Sanitary Engineer.

(*3*) The Sanitary Engineer shall, in all cases, act as adviser of the local authority.

Submission of sketch, statement and application.

3. (*1*) When the sketch of the project has been drawn up under rule 2 and it is estimated to cost Rs. 10,000 or more, or, in the case of an estimate of less than Rs. 10,000, if the financial assistance of Government is desired, the local authority shall submit it to the Sanitary Board through the Commissioner of the Division and the Sanitary Engineer, together with a statement wherein shall be shewn the amount of the funds available to meet the cost of the project either from current revenue or by way of loan or from any other source.

(*2*) If in the opinion of the Sanitary Engineer the scheme is unsatisfactory, or is submitted with insufficient information, or requires revision or alteration, the Sanitary Engineer may return the scheme to the local authority, with instructions to supply such additional information or to make such revision or alteration as the case may be.

(*3*) The Sanitary Board, after considering the project, shall forward it to the Municipal Department of Government for administrative approval with such recommendations as they may think fit.

(*4*) In the case of a scheme the total estimated cost of which is less than Rs. 10,000, not being part of a larger scheme or one for which financial assistance from Government is required, the administrative approval or final sanction of Government shall not be necessary; but the Sanitary Engineer must be consulted, and the scheme, with a copy of the Sanitary Engineer's opinion on it, must be submitted to the Commissioner of the Division for approval.

4. In order to obtain the administrative approval of Government to any project, the local authority shall satisfy Government—

Conditions precedent to obtaining administrative approval of Government to a project.

(*1*) that the cost of maintenance of the projected work can be met by the local authority from revenue;

(2) that any loan required to meet the cost of the work can be repaid, together with the interest thereon within the period that may be prescribed by the Government; and

(3) that the work can be done effectually in the manner and for the cost proposed.

Procedure after grant of administrative approval. Preparation of detailed plans and estimates.

5. (1) When the administrative approval of Government or the Commissioner of the Division, as the case may be, has been obtained to any project and in no case before, the local authority may arrange for the preparation of detailed plans and estimates, and for this purpose may—

(a) apply to Government in the Municipal Department for the services of the Sanitary Engineer; or

(b) apply to Government in the Public Works Department for the services of their officers; or

(c) with the previous sanction of the Sanitary Engineer entrust the work—

(i) to the District Engineer, or

(iv) to a private firm of established reputation:

Provided that in cases (ii) and (iii) the selection of the Engineer shall be approved of by the Sanitary Engineer who shall first satisfy himself that the said Engineer is fully qualified for the work in question.

(2) In the cases of (b) and (c) referred to in sub-rule (1), the plans and estimates while in course of preparation shall be subject to the examination and control of the Sanitary Engineer.

Submission of detailed plans and estimates to Government through Sanitary Board for final sanction.

6. (1) The plans and estimates shall, on completion, be forwarded in duplicate to the Sanitary Board, through the Commissioner of the Division and the Sanitary Engineer, together with a full report on the financial aspect of the scheme and the state of public feeling in regard to it, and, if a loan is required, with an application in the prescribed form.

(2) In the case of drainage schemes the estimates must be submitted in Sanitary Board's Forms Nos. 21 and 22, copies of which may be obtained from the office of the Sanitary Engineer.

(3) When the scheme has not been prepared in the Sanitary Engineer's office, it shall be accompanied by full details of the calculations of the sizes and strength of the various works and complete information as to the prices on which the estimates have been framed.

(4) The Sanitary Board shall submit the scheme to the Municipal Department of Government for final sanction with an expression of their opinion on its merits as finally drawn up.

Commencement of work

7. No work shall be commenced on the project nor shall any agreement be entered into until the detailed plans and estimates have received the final sanction of Government or of the Commissioner of the Division, as the case may be.

Conditions as to detailed engineering supervision

8. (1) Where the cost of the projected work is estimated to amount to Rs. 10,000 or more, adequate provision for detailed engineering supervision shall be a condition precedent to the grant of final sanction by the Government.

(2) In the absence of special sanction to the contrary, the local authority shall agree to such one of the following conditions as may be considered suitable in each case—

(a) that with the previous approval of the Sanitary Engineer the work shall be carried out under the supervision of the District Engineer or any other Engineer in its employ; or

(b) that the work shall be carried out under the supervision of an Engineer specially employed for the purpose, assisted by an adequate establishment of properly qualified overseers, the name and qualifications of the Engineer having been previously submitted to the Sanitary Engineer and approved by him; or

(*c*) that the work shall be carried out by the Public Works Department, if that Department can undertake it; in such cases an extra charge of 15 per cent. on the sanctioned estimates shall be made for supervision, unless the case is one of extraordinary difficulty, under which circumstances a higher charge may be imposed under the orders of Government; or

(*d*) that the work shall be carried out under the complete supervision or control of the Sanitary Engineer under an arrangement provided for in rule 9.

(*3*) In the cases of conditions (*a*) and (*b*) referred to in sub-rule (*2*), the work while in progress shall be subject to the inspection and control of the Sanitary Engineer.

Taking over of complete supervision and control by Sanitary Engineer

9. (*1*) When requested by a local authority the Sanitary Engineer shall, if he considers that he can so arrange without detriment to the public service, take over the complete supervision and control of the work of construction of schemes of water-supply, sewerage or drainage undertaken by such authority on payment of the fees prescribed in rule 25.

(*2*) These fees shall cover the salaries and expenses of the necessary resident engineers, assistants, subordinates and menials, who may be appointed by the Sanitary Engineer, as well as the cost of a local office for the resident engineer, stationery and instruments and other incidental expenses incurred by the supervising staff.

Report by local authority to the Commissioner in case of small work

10. Where the estimated cost of works amounts to less than Rs. 10,000, the local authority shall report, for the information of the Commissioner of the Division, the agency by which it is proposed to have such works carried out, and shall follow the instructions issued by him in the matter.

3. The object of the scholarships being to enable ladies to enter the College at Delhi and to take up a professional course there, the award will be made to those, otherwise eligible, who are prepared to join the Junior Intermediate class of a recognised College or any similar class this year with a view to qualifying, after a course of study for two years, for admission to the Medical College at Delhi.

They must also guarantee that they will study for two years in a college affiliated to the local University, the course leading up to the Intermediate examination, or an examination recognized for this purpose as equivalent thereto, such special subjects as may be prescribed by that University as qualifying for entrance upon a professional course of medical study being included in the course. They must also undertake that on the completion of these two years they will seek admission to the Medical College to be established at Delhi, and continue their studies up to the examinations for the Medical degree for which that College will prepare students.
